

Job Description: Senior Backend Engineer - FinTech Platform

Company: Velox Payments | Location: Hybrid (Austin, TX) | Type: Full-time | Posted: June 2024

Velox Payments is a fast-growing B2B fintech company processing over \$2 billion in transactions annually. We are looking for a Senior Backend Engineer to join our Core Platform team and help scale our payment infrastructure.

Role Overview

You will design, build, and maintain the APIs and microservices that power Velox's payment processing engine. This is a high-impact, high-ownership role. You will collaborate closely with product, DevOps, and data engineering teams. The ideal candidate has a proven track record of building reliable, high-throughput systems in a production environment.

Required Qualifications

- 5+ years of professional software engineering experience.
- Expert-level Python (FastAPI, Celery, SQLAlchemy).
- Strong experience with PostgreSQL and Redis.
- Proficiency with Docker and Kubernetes in production.
- AWS experience: EC2, RDS, SQS, Lambda, S3.
- Demonstrated experience building and consuming REST APIs.
- Experience with message queues and event-driven architecture.
- Track record of leading technical projects end-to-end.
- Experience with CI/CD pipelines (GitHub Actions or similar).
- Strong understanding of security best practices in financial systems.

Nice to Have

- Experience with payment gateways (Stripe, Adyen, or similar).
- Familiarity with PCI-DSS compliance requirements.
- Exposure to Go or Rust for performance-critical services.
- Experience with gRPC and Protocol Buffers.
- Prior fintech or payments domain experience.

Responsibilities

- Design and build scalable microservices for payment processing.
- Own and improve core APIs used by 300+ enterprise clients.
- Conduct thorough code reviews and mentor junior engineers.
- Write comprehensive unit, integration, and load tests.
- Participate in on-call rotation (approximately 1 week per quarter).
- Collaborate with product managers to define technical requirements.
- Document system architecture and API contracts.

Compensation and Benefits

- Base salary: \$160,000 to \$195,000 depending on experience.
- Equity: 0.05% to 0.15% stock options, 4-year vest with 1-year cliff.
- Annual performance bonus: up to 15% of base salary.
- Full health, dental, and vision insurance (employee + family).
- 401k with 4% employer match.
- \$2,000 annual learning and development budget.

- Home office stipend: \$1,500 one-time setup + \$100/month.
- Flexible PTO (minimum 20 days encouraged).
