Professional Summary

Senior backend engineer with 8 years of experience building high-throughput financial systems. Expert in Python microservices, cloud infrastructure, and payment processing. Led teams of 4 to 6 engineers at two high-growth fintech companies. Passionate about reliability engineering and clean API design.

Work Experience

SENIOR SOFTWARE ENGINEER - PayCore Inc. (2020 to 2024, 4 years)

- Built and owned payment processing microservices handling 50,000 transactions/day using Python (FastAPI) and PostgreSQL.
- Migrated monolith to Kubernetes-based microservices on AWS, reducing latency by 40%.
- Designed event-driven architecture using AWS SQS and Celery for async payment workflows.
- Led a team of 5 engineers, conducted code reviews, and owned sprint planning.
- Achieved PCI-DSS Level 1 certification for the platform by implementing tokenisation and encryption.
- Built CI/CD pipelines using GitHub Actions with automated test coverage gates.

BACKEND ENGINEER - TransactIQ (2016 to 2020, 4 years)

- Developed REST APIs for a B2B payments platform using Python (Django REST Framework).
- Integrated with Stripe and Adyen payment gateways.
- Used Redis for caching and session management, reducing API response time by 35%.
- Managed AWS infrastructure: EC2, RDS (PostgreSQL), S3, Lambda.

Technical Skills

- Languages: Python (expert), Go (intermediate), SQL
- Frameworks: FastAPI, Celery, SQLAlchemy, Django REST
- Databases: PostgreSQL, Redis, DynamoDB
- Cloud: AWS (EC2, RDS, SQS, Lambda, S3), certified AWS Solutions Architect
- DevOps: Docker, Kubernetes, GitHub Actions, Terraform
- Protocols: REST, gRPC, Protocol Buffers
- Compliance: PCI-DSS, SOC 2 Type II

Education

B.S. Computer Science, University of Texas at Austin, 2016
