

Resume: Marcus Williams

Email: marcus.w@email.com | GitHub: github.com/marcusw | Location: Dallas, TX (open to hybrid)

Summary

Backend developer with 4 years of experience in Python web development and cloud deployment. Solid foundation in REST API development and SQL databases. Looking to transition into a more infrastructure-focused senior role.

Experience

SOFTWARE ENGINEER - Shopify Partner Agency (2021 to 2024)

- Built REST APIs using Python (Flask and Django) for e-commerce clients.
- Used PostgreSQL and MySQL for database design and query optimisation.
- Deployed applications on AWS (EC2 and S3 only) and configured basic CI/CD with CircleCI.
- Worked with Docker for containerisation but no Kubernetes experience.
- Collaborated with 2-person teams; no formal technical leadership experience.

JUNIOR DEVELOPER - Freelance (2020 to 2021)

- Built web applications for small businesses using Python (Django) and JavaScript.
- Limited cloud experience (mainly shared hosting and basic AWS EC2).

Skills

- Languages: Python, JavaScript, SQL
- Frameworks: Django, Flask (not FastAPI)
- Databases: PostgreSQL, MySQL
- Cloud: AWS (EC2, S3 only), limited RDS experience
- Tools: Docker, CircleCI, Git
- No Kubernetes, Celery, Redis, gRPC, or payment gateway experience

Education

B.S. Information Technology, University of North Texas, 2020
