

SmartPay Gateway - Product Manual v4.1

SmartPay by Orbital Fintech | Support: docs.smartpay.io | Version 4.1 | Updated: April 2024

SmartPay is a cloud-based payment processing gateway that enables businesses to accept credit cards, debit cards, bank transfers, and digital wallets. This manual covers setup, features, limits, fees, security, and troubleshooting.

1. Getting Started

To activate your SmartPay account: complete identity verification (KYC) within 7 days of signup, provide a valid business registration document, link a bank account for settlement, and configure your API keys in the developer dashboard. Accounts not verified within 7 days are suspended. Verification typically takes 1 to 3 business days.

2. Accepted Payment Methods

- Credit cards: Visa, Mastercard, American Express, Discover.
- Debit cards: Visa Debit, Mastercard Debit, PIN-based debit (US only).
- Digital wallets: Apple Pay, Google Pay, PayPal, Shop Pay.
- Bank transfers: ACH (US), SEPA (Europe), BACS (UK).
- Buy Now Pay Later: Klarna and Afterpay available as add-ons.
- Cryptocurrency: Bitcoin and Ethereum via SmartPay Crypto (separate activation required).

3. Transaction Limits

- Standard accounts: \$10,000 per single transaction, \$50,000 per day.
- Verified business accounts: \$50,000 per single transaction, \$250,000 per day.
- ACH transfers: \$25,000 per transaction, \$100,000 per day.
- International transactions: subject to 1.5% additional currency conversion fee.
- Limits can be increased with 30 days advance request and documentation.

4. Fee Structure

Processing fees are charged per successful transaction. No monthly fees for standard accounts. Volume discounts apply above \$50,000 per month.

- Domestic card (Visa/Mastercard): 1.9% + \$0.25 per transaction.
- American Express: 2.4% + \$0.25 per transaction.
- Digital wallets (Apple Pay, Google Pay): 1.9% + \$0.25 (same as card).
- ACH bank transfer: 0.5% capped at \$5.00 per transaction.
- International cards: additional 1.5% on top of standard rate.
- Chargebacks: \$25 fee per dispute (refunded if you win the dispute).
- Refunds: no fee for refunds within 30 days. After 30 days: 0.5% processing fee.

SmartPay Gateway - Product Manual v4.1 (continued)

5. Settlement and Payouts

Standard settlement timeline: funds are available in your linked bank account 2 business days after the transaction (T+2). Same-day payouts are available for accounts processing above \$10,000/month for an additional 0.25% fee. Payouts are processed Monday through Friday excluding public holidays. Weekends and holiday transactions are batched and settled on the next business day.

6. Refunds and Disputes

Refunds can be issued in full or partially from the SmartPay dashboard or via API. Full refunds within 30 days are processed at no fee. Partial refunds retain the original processing fee. For chargebacks: you have 7 days to submit evidence after receiving a dispute notification. Accepted evidence formats include transaction receipts, shipping confirmation, and signed agreements. SmartPay's dispute win rate for merchants with complete documentation is 68%.

7. Security and Compliance

SmartPay is PCI-DSS Level 1 certified, the highest level of payment security compliance. All cardholder data is encrypted using AES-256. SmartPay uses 3D Secure 2.0 (3DS2) for additional authentication on high-risk transactions. Fraud detection runs on every transaction using machine learning models trained on 2 billion+ transactions.

- Two-factor authentication (2FA) is mandatory for all dashboard logins.
- API keys must be rotated every 90 days.
- Webhook endpoints must use HTTPS with a valid SSL certificate.
- IP whitelisting is available for API access restriction.

8. Integration Options

SmartPay supports four integration methods: Hosted Checkout Page (no coding required), JavaScript Drop-in UI (embed into your site), REST API (full programmatic control), and native SDKs for iOS, Android, Python, PHP, Node.js, Ruby, and Java. All APIs use JSON and OAuth 2.0 authentication. API response time SLA: 99th percentile under 300ms.

9. Reporting and Analytics

The SmartPay dashboard provides real-time transaction monitoring, daily/weekly/monthly revenue reports, failed payment analysis, chargeback tracking, and customer payment method breakdown. Reports can be exported as CSV or PDF. Data is retained for 7 years for compliance purposes. Custom webhooks notify your system of payment events in real-time.

10. Support Channels

SmartPay offers multiple support channels depending on plan:

- Standard plan: Email support (response within 24 hours), documentation portal.
- Professional plan: Live chat (Mon-Fri 9am-6pm EST), email, documentation.
- Enterprise plan: 24/7 phone support, dedicated account manager, Slack connect.
- Developer issues: GitHub issues and Stack Overflow tag 'smartpay-api'.
- Emergency (service outages): status.smartpay.io and @smartpaystatus on Twitter.

11. Troubleshooting Common Errors

- Error 4001 (Insufficient Funds): Card declined by issuer. Ask customer to use a different card.

- Error 4002 (Card Expired): Expiry date mismatch. Verify card details.
- Error 4003 (Do Not Honour): Generic decline. Customer must contact their bank.
- Error 4010 (3DS Authentication Failed): 3DS check failed. Retry or request alternate payment.
- Error 5001 (Gateway Timeout): SmartPay side issue. Retry after 60 seconds. If persistent, check status.smartpay.io.
- Error 5002 (Duplicate Transaction): Same transaction ID submitted twice. Use a unique transaction ID per attempt.
